PRESS RELEASE

First day of trading on Euronext Milan of the ordinary shares of Technoprobe S.p.A.

Cernusco Lombardone (LC), May 2, 2023 – Technoprobe S.p.A., a company listed on Euronext Growth Milan and leader in the design and production of Probe Cards (“**Company**” or “**Technoprobe**”), hereby announces that, today, trading of its ordinary shares on regulated market Euronext Milan (“**Euronext Milan**”), organized and managed by Borsa Italiana (“**Borsa Italiana**”), has started.

As from today, the ordinary shares of Technoprobe have been simultaneously delisted from the multilateral trading facility Euronext Growth Milan (“**Euronext Growth Milan**”) organized and managed by Borsa Italiana.

Today, the share capital of Technoprobe amounts to Euro 6,010,000 divided into no 601,000,000 of shares.

Stefano Felici, CEO of Technoprobe S.p.A., on the first day of listing, stated: “*The listing on the Euronext Growth Milan market, finalized on February 15, 2022, represented a growth opportunity for Technoprobe which sees the transition to the Euronext Milan market as the finalization of a collective effort in terms of governance and communication transparency. This step provides further visibility in the financial markets, guaranteeing the necessary support for the expansion of the Group*”.

This press release will be available on Technoprobe’s website www.technoprobe.com, in the Investor Relations section.

Technoprobe Group

Technoprobe is a leading company in the field of semiconductors and microelectronics. Established in 1996 by the entrepreneurial spirit of its founder Giuseppe Crippa, Technoprobe specialises in the design and manufacture of Probe Cards, i.e. electro-mechanical interfaces used for the functional testing of chips. Its market segment is the testing of non-memory or SOC (system on chip) semiconductors. The Group is the only Probe Card manufacturer in Italy and a world leader in terms of volume and turnover. It has partnerships and collaborations with some of the world’s largest microelectronics, IT and digital companies. Probe cards are hi-tech devices that are custom-made for each chip and allow the function of chips to be tested during the manufacturing process. These technologically-advanced designs and solutions are essential for ensuring the proper functioning and reliability of devices that play a crucial role in industries such as Information Technology, 5G, Internet of Things, home automation, automotive, aerospace, etc. As a result, Technoprobe is a critical link in the supply chain for the manufacture of chips, which are at the heart of today’s technological world. Technoprobe is a rapidly expanding hub of technological research and innovation with approximately 2700 employees (1700 of them located in Italy), three research centres and more than 600 certified patents. Technoprobe has 14 locations worldwide. The Group’s Italian headquarters are in Cernusco Lombardone (LC), a municipality on the outskirts of Milan where there is also a production plant that covers an area of about 18,000 sqm. The Group has two additional production plants in Italy: one in Agrate (MB) covering about 3,000 sqm, and one in Osnago (LC) covering about 5,000 sqm. Also in Italy a Design Center was opened in Sicily, in Catania, in 2022. The Group also has 10 other locations spread across Europe (France and Germany), Asia (Taiwan, South Korea, China, Japan, Philippines and Singapore) and the United States (two locations in California).
