PRESS RELEASE

Communication of total amount of voting rights pursuant article 85-bis, paragraph 4 bis, Issuers' Regulation

Cernusco Lombardone (LC), 1 June 2023 – Technoprobe S.p.A., a leading company in the design and production of Probe Card (the “**Company**” or “**Technoprobe**”) hereby announces that, following the sale by shareholders Roberto Alessandro Crippa, Cristiano Alessandro Crippa, Monica Crippa and Stefano Felici, of number 25,250,000 ordinary shares of the Company, completed on 30 May 2023, the total number of ordinary shares with an increased vote and, therefore, the total number of voting rights exercisable at the shareholders' meeting, was reduced.

The following table shows the information related to the shares representing the issuer's shares capital and the number of voting rights exercisable at the shareholders' meeting from 30 May 2023 compared with the previous situation.

	CURRENT SITUATION		PREVIOUS SITUATION	
	Number of shares representing the share capital	Number of voting rights	Number of shares representing the share capital	Number of voting rights
Total	601,000,000	1,051,750,000	601,000,000	1,077,000,000
Of which:				
Ordinary shares without increased voting rights	150,250,000	150,250,000	125,000,000	125,000,000
Ordinary shares with increased voting rights	450,750,000	901,500,000	476,000,000	952,000,000

This press release will be available on Technoprobe's website www.technoprobe.com, in the Investor Relations section.

Technoprobe Group

Technoprobe is a leading company in the field of semiconductors and microelectronics. Established in 1996 by the entrepreneurial spirit of its founder Giuseppe Crippa, Technoprobe specialises in the design and manufacture of Probe Cards, i.e. electro-mechanical interfaces used for the functional testing of chips. Its market segment is the testing of non-memory or SOC (system on chip) semiconductors. The Group is the only Probe Card manufacturer in Italy and a world leader in terms of volume and turnover. It has partnerships and collaborations with some of the world's largest microelectronics, IT and digital companies. Probe cards are hi-tech devices that are custom made for each chip and allow the function of chips to be tested during the manufacturing process. These technologically-advanced designs and solutions are essential for ensuring the proper functioning and reliability of devices that play a crucial role in industries such as Information Technology, 5G, Internet of Things, home automation, automotive, aerospace, etc. As a result, Technoprobe is a critical link in the supply chain for the manufacture of chips, which are at the heart of today's technological world. Technoprobe is a rapidly expanding hub of technological research and innovation with approximately 2700 employees (1700 of them located in Italy), three research centres and more than 600 certified patents. Technoprobe has 14 locations worldwide. The Group's Italian headquarters are in Cernusco Lombardone (LC), a municipality on the outskirts of Milan where there is also a production plant that covers an area of about 18,000 sqm. The Group has two additional production plants in Italy: one in Agrate (MB) covering about 3,000 sqm, and one in Osnago (LC) covering about 5,000 sqm. Also in Italy a Design Center was opened in Sicily, in Catania, in 2022. The Group also has 10 other locations spread across Europe (France and Germany), Asia (Taiwan, South Korea, China, Japan, Philippines and Singapore) and the United States (two locations in California).
